No part of this publication may be reproduced or transmitted in any form, or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (21 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1983 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for regular articles.

CONTENTS OF VOLUME 25

Number 1, January 1983

THOMAS E. DUDAR AND RAKESH K. JAIN. Microcirculatory Flow Changes during Tissue Growth 1

EFFIE C. TSILIBARY AND STEVEN L. WISSIG. Lymphatic Absorption from the Peritoneal Cavity: Regulation of Patency of Mesothelial Stomata 22

EVELINE E. SCHNEEBERGER. Plasmalemmal Vesicles in Pulmonary Capillary Endothelium of Developing Fetal Lamb Lungs 40

DAVID O. DEFOUW, WILLIAM O. CUA, AND FRANCIS P. CHINARD. Morphometric and Physiological Studies of Alveolar Microvessels in Dog Lungs *in Vivo* after Sustained Increases in Pulmonary Microvascular Pressures and after Sustained Decreases in Plasma Oncotic Pressures..... 56

R. F. POTTER AND A. C. GROOM. Capillary Diameter and Geometry in Cardiac and Skeletal Muscle Studied by Means of Corrosion Casts.. 68

DAN SIMIONESCU AND MAYA SIMIONESCU. Differentiated Distribution of the Cell Surface Charge on the Alveolar-Capillary Unit. Characteristic Paucity of Anionic Sites on the Air–Blood Barrier 85

WILLIAM P. PAASKE. Microvascular Exchange of Albumin..... 101

BRUCE KLITZMAN, ALEKSANDER S. POPEL, AND BRIAN R. DULING. Oxygen Transport in Resting and Contracting Hamster Cremaster Muscles: Experimental and Theoretical Microvascular Studies 108

ANNOUNCEMENTS 132

Number 2, March 1983

Y. P. MA, T. M. LEUNG, S. H. LAU, AND H. C. KWAN. Pseudo-On-Line Fast Response Microvessel Dimensions Video Graphic Recorder with Electrical Signal Output 133

I. I. H. CHEN AND R. L. PREWITT. Capillary Pressure Gradients in Cremaster Muscle of Normotensive and Spontaneously Hypertensive Rats 145

THOMAS R. BLAKE AND JOSEPH F. GROSS. Analysis of Transcapillary Exchange and Intraluminal Transport in the Microocclusion of Single Capillaries 156

KATHRYN W. BALLARD, GARY PAULSEN, NAOMI OREN-WOLMAN, AND PAUL H. GUTH. Age-Related Changes in the Gastric Submucosal Arterioles and Gastric Acid Secretion 176

SCOT L. HARPER AND H. GLENN BOHLEN. *In Vitro* and *in Vivo* Measurement of Red Cell Velocity with Epi- and Transillumination 186

HARVEY R. WEISS, ELLEN BUCHWEITZ, AND ARABINDA K. SINHA. Effect of Hypoxic–Hypocapnia on Cerebral Regional Oxygen Consumption and Supply 194

M. R. TURNER, GERALDINE CLOUGH, AND C. C. MICHEL. The Effects of Cationised Ferritin and Native Ferritin upon the Filtration Coefficient

of Single Frog Capillaries. Evidence That Proteins in the Endothelial Cell Coat Influence Permeability 205

Abstracts of the American Microcirculatory Society Meeting, 1983 .. 223

Number 3, May 1983

Aristidis S. Charonis and Steven L. Wissig. Anionic Sites in Basement Membranes. Differences in Their Electrostatic Properties in Continuous and Fenestrated Capillaries 265

Warren R. Jones, Patricia J. O'Morchoe, and Charles C. C. O'Morchoe. The Organization of Endocytotic Vesicles in Lymphatic Endothelium 286

Jos Van Reempts, Marc Haseldonckx, and Marcel Borgers. A Simple Technique for the Microscopic Study of Microvascular Geometry and Tissue Perfusion, Allowing Simultaneous Histopathologic Evaluation 300

Stan W. Adamski, Erik Svensjö, Kay Su, and George J. Grega. Effects of Captopril and Propanolol on Bradykinin-Induced Changes in Vascular Pressures, Lymph Total Protein Concentration, and Weight in Canine Forelimbs 307

Paul H. Guth and Ken Hirabayashi. The Effect of Histamine on Microvascular Permeability in the Muscularis Externa of Rat Small Intestine 322

David E. Sims and Jane A. Westfall. Analysis of Relationships between Pericytes and Gas Exchange Capillaries in Neonatal and Mature Bovine Lungs 333

Robert W. Mazzone and Steven M. Kornblau. Influence of Vascular and Transpulmonary Pressures on Endothelial Vesicles in Nonedematous and Edematous Lungs 343

Magnus Bundgaard, Pia Hagman, and Christian Crone. The Three-Dimensional Organization of Plasmalemmal Vesicular Profiles in the Endothelium of Rat Heart Capillaries 358

J. R. Casley-Smith. Varying Total Tissue Pressures and the Concentration of Initial Lymphatic Lymph 369

D. K. Adcock, R. E. Drake, R. L. Scott, and J. C. Gabel. Dog Lymph Flow in Increased Capillary Permeability States 380

Roger C. Wagner, Candy S. Robinson, Philip J. Cross, and James J. Devenny. Endocytosis and Exocytosis of Transferrin by Isolated Capillary Endothelium 387

Author Index for Volume 25 397

Information for Contributors

Microvascular Research (MVR) is an international journal dedicated to the dissemination of fundamental information related to the microvascular field.

Submission of Manuscripts. One original and two complete carbon copies should be sent via first-class mail, in flat form, to **Microvascular Research Editorial Office, Dr. David Shepro, 2 Cummington St., Boston University, Boston, Massachusetts 02215.** MVR will not be responsible for manuscripts lost in the mails.

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Microvascular Research* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Manuscript Style. Papers should be typewritten, double-spaced on one side of the paper, with wide margins. The manuscript should be divided into the following sections: Abstract, Introduction, Materials and Methods, Results, Discussion, References, and Acknowledgments. The abstract, which will precede each article, should be 225 words or less and should be typed on a separate sheet. In addition the manuscript should include, on separate pages, (1) the complete title with names of authors and affiliations (including ZIP CODE), (2) running title, consisting of no more than 40 characters including spaces, (3) key words that are suitable as **Index Descriptors,** and (4) the address to which proofs are to be mailed.

Tables. Tables are to be typed on separate sheets and numbered with Arabic numerals. Each table should contain an explanatory title that would make reference to the text unnecessary.

Figures. These should be numbered with Arabic numerals and should be mentioned consecutively in the text. Legends are to be typed together on a separate sheet.

Illustrations, drawn with a lettering set, should be in finished form ready for the printer. Lettering on the original drawing should be large enough (minimum, 4 mm) to be legible after reduction to one-third. Graphs should be plotted with black India ink on light blue coordinate paper, no larger than 8.5 × 11 inches, with coordinates properly labeled; grid lines that are to show in the engraving should be linked in black.

Photographs should be submitted as glossy prints and not marred by staples, paper clips, or pencil marks. For best reproduction of halftones, provide clear, sharp photographs with adequate contrast. The best results will be obtained if authors match the contrast and density of all figures appearing on a single plate. If this is not possible, please provide unounted original art. Providing an overlay that indicates the most critical areas of micrographs will also aid in ensuring high-quality reproduction. The dimensions of the printed page are 5 × 8 in. (127 × 203 mm). It is recommended that micrographs be submitted as near as possible to this size so that large reductions will not be necessary.

Color illustrations are acceptable, but at the author's expense. An excessive number of tables or illustrations may necessitate a charge to the author.

Footnotes. These should be designated in the *text* by superscript *numbers* and typed on a separate sheet; in the tables by superscript *letters* and typed at the bottom of the table.

Abbreviations. In general these should follow the usage employed by Chemical Abstracts. The Handbook for Authors of the American Chemical Society is also an acceptable guide.

References. Citations in the text consist of the author's name, and the year of publication in parentheses. The references should be listed alphabetically and should conform to the following style:

SIMIONESCU, N., SIMIONESCU, M., AND PALADE, G. E. (1978). Structural basis of permeability in sequential segments of the microvasculature of the diaphragm: I. Bipolar microvascular fields. *Microvasc. Res.* **15,** 1–16.

BELAMARICH, F. A. (1976). Hemostasis in animals other than mammals: The role of cells. *In* "Progress in Hemostasis and Thrombosis" (T. Spaet, ed.), Vol. 3, pp. 191–220. Grune and Stratton, New York.

Abbreviations of journal names should follow the style of Chemical Abstracts' *ACESS, Service Source Index* (1969 Edition). Unpublished observations and personal communications should be cited in the *text* as such.

Reprints. Authors will receive 50 reprints at no charge. Additional copies may be ordered when galley proof is mailed.

Brief Communications. Preliminary reports will be reviewed for prompt publication; however, the comments must be restricted to no more than five typewritten pages, including references, tables, and illustrations. No abstract should be included.

To facilitate the publication of manuscripts, especially those papers based upon a new, theoretical concept, the Editors invite each contributor to submit the names of at least three scientists who could review the submitted manuscript.
